PROFESSIONAL SUMMARY

Final-year Software Engineering student at the University of Central Punjab and MERN Stack Developer building full-stack web applications with React.js, Node.js, Express.js, MongoDB, and PostgreSQL (Supabase). Experienced in RESTful APIs, JWT authentication, Role-Based Access Control (RBAC), and automated testing (Jest, Vitest, Playwright). Seeking a Full Stack / MERN Stack Developer internship to build secure, scalable web applications.

EDUCATION

University of Central Punjab (UCP) Lahore, Pakistan
Bachelor of Science in Software Engineering (BSSE) | CGPA: 3.13/4.00 Oct 2023 – Jul 2027 (Expected)
Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Advanced Web Development, Database Systems, Software Construction

SKILLS

Core Stack: MERN Stack (MongoDB, Express.js, React.js, Node.js), Full Stack Development
Languages: JavaScript (ES6+), TypeScript, Python, Java, SQL, HTML5, CSS3
Frontend: React.js, Vite, Redux Toolkit, React Router, Tailwind CSS, Axios, React Hook Form, Formik, Yup, Zod, Responsive Web Design, SPA
Backend & APIs: Node.js, Express.js, RESTful APIs, MVC Architecture, Middleware, CRUD, CORS, Rate Limiting, Webhooks, Payment Integration
Databases: MongoDB, Mongoose (ODM), PostgreSQL, Supabase, Row-Level Security (RLS), MySQL
Security: JWT Authentication, Role-Based Access Control (RBAC), bcrypt, Helmet, Supabase Auth
Testing: Jest, Supertest, Vitest, Playwright (E2E), Postman, Unit and Integration Testing
Tools & Practices: Git, GitHub, Agile/Scrum, SDLC, Data Structures & Algorithms (DSA), OOP

EXPERIENCE

Freelance Full Stack Developer | JAB LEATHER (Client Project) Apr 2025 – Present
- Built a full-stack e-commerce platform for a client leather goods store with a 14-category catalog, product variants (size, color), cart, wishlist, checkout, and a USD/PKR currency engine.
- Developed a Shopify-style admin suite: KPI dashboard, product catalog with bulk actions, 8-section product editor with SEO preview, and order management.
- Implemented Supabase Auth, admin-only role-based access control (RBAC), and PostgreSQL Row-Level Security (RLS) policies to protect customer data and enforce access restrictions.
- Designed a provider-agnostic payment layer with server-side price validation and HMAC webhook verification; tested with Vitest and Playwright E2E.
- Delivered the platform using React.js, Vite, Tailwind CSS, Node.js, Express.js, and Supabase; source code at github.com/Arham38/JABLEATHER.

PROJECTS

CodeCraft Academy: Bootcamp Learning Management System | Personal Project Oct 2026
Tech Stack: React.js, Vite, Tailwind CSS, Node.js, Express.js, MongoDB, Jest, Playwright github.com/Arham38/LMS
- Built a cohort-based LMS for live bootcamps: course catalog, enrollment approval, PKR payment verification ledger, attendance, quizzes, assignments, and gradebook.
- Implemented JWT authentication (bcrypt), RBAC middleware, Zod validation, Helmet, and rate limiting; enforced time-based meeting join windows with automated attendance.
- Developed anti-cheat quizzes (randomized questions, time limits, answer masking) and rubric-graded assignments with late penalties.
- Integrated presigned-URL cloud storage for uploads; tested with Jest, Supertest, and Playwright E2E.

SME ERP System | Full Stack Developer (Academic Project) Jan 2024 – Apr 2024
Tech Stack: MongoDB, Express.js, React.js, Node.js, Mongoose, bcrypt, Postman
- Built a modular ERP web application with 8 business modules, including Inventory, Sales, and Finance.
- Designed and implemented 40+ RESTful APIs with full CRUD; enforced Role-Based Access Control (RBAC).
- Created Mongoose models with schema validation and bcrypt password hashing; tested all endpoints in Postman.

AuthentixAI: Deepfake Analyzer | Final-Year Project (Team of 3) Oct 2026 – Present
Tech Stack: Next.js, FastAPI, MongoDB, PyTorch, Hugging Face Transformers (planned)
- Designed a free, web-based platform to detect deepfakes in images, video, and audio; project in progress.
- Designed an AI pipeline using Vision Transformer/CLIP (image, video), Wav2Vec2/HuBERT (Urdu audio), and Grad-CAM (planned, not yet implemented).
